UCSB LIBRARY

CATALOGUE
OF PRODUCTS FORWARDED
BY THE
SECRETARY OF PUBLIC WORKS
OF THE
REPUBLIC OF GUATEMALA
TO THE
BOSTON EXHIBITION
OF
1883.

NEW YORK.

PRINTING OFFICE OF "LAS NOVEDADES,"
23 LIBERTY STREET.

GUATEMALA,

the capital of this Central-American Republic, is situated on an extended plain between $14^{\circ}, 37', 30''$ of Northern latitude and $90^{\circ}, 30', 47''$ Western longitude. It is noted for its buildings, the cleanliness of its streets and its picturesque surroundings. It has a population of 60,000 souls.

The Republic is divided into twenty-three departments, every one of which abounds in natural resources, as is rendered patent by the variety of products forwarded thence to the Boston Exhibition.

Guatemala possesses various ports on the Pacific serving as an outlet for its trade, but its chief ports are in a northerly direction, on the Atlantic. These are *Santo Tomás* with a handsome bay; *Izabal*, on the borders of the lagoon of this name; *Panzos*, *Teleman* and *Gualan*.

There has been made provision for the building of a railroad toward the North of the Republic, which is to connect with the one in the South very nearly finished and this communication by rail will thus become interoceanic. This will indeed be the greatest work of the many for all of which the country will be indebted to the solicitude of the present administration, at the head of which stands General Barrios.

The present catalogue enumerates the bulk of raw material and national manufactures constituting the resources of the country. Prominent in importance among them are:

Woods. There is great abundance and variety of timber. Cabinet woods are also numerous, there being some most valuable species on account of their fineness and color. Notwithstanding the abundance of these woods not much of an export trade is carried on in them so far, owing to expensive and difficult transportation, but as soon as the Northern

Railroad shall be in operation, placing Guatemala so to say at the very doors of the United States and Europe, its wood will form an important item of traffic.

Coffee. Coffee is destined to contribute powerfully toward rapidly increasing the natural wealth of the country and maintain its economical equilibrium not only by the reason of the large amount annually exported, but owing to the high repute of its quality in foreign markets. A large amount of capital is invested in coffee plantations, and nothing has been left undone by the Government of the Republic to aid the development and progress of coffee culture.

Cocoa. The greatest portion of what is cultivated thereof is consumed at home; the trifling amounts annually exported are known abroad as "Soconusco Cocoa." Its nourishing qualities and the aroma of its flavor are fully appreciated by all connoisseurs familiar with this sort, which is acknowledged to be unsurpassed as a superior article. The Republic possesses an extensive area of land suitable to be brought under cocoa cultivation, so that the day may not be distant the Guatemalan crop thereof will assume more respectable proportions.

Sugar-cane. A great many people have gone into sugar planting in Guatemala, and the amount of capital invested therein is considerable. This branch of agriculture is the one next in importance in Guatemala, and is so considered. The Republic exports every year something like a hundred thousand quintals of sugar and upwards, of different grades, bringing abroad such good prices that sugar planting is not only persevered in, but carried on more and more extensively. Aside from the amount exported we have named, many thousand quintals are retained for home consumption besides the sugar from which rum is distilled in the country.

India Rubber. The valuable tree from which India Rubber is gathered is indigenous to the soil and abundantly so. The article is exported both to the United States and Europe. General Barrios, President of Guatemala, has formed a company having for its object the planting on a large scale of India Rubber trees.

Textile Plants. There exists in the country quite a number of various fibrous plants, constituting an element of wealth from which most profitable returns may be drawn in Guatemala, as the samples exhibited at the Boston show moreover corroborate.

Minerals. The northern portion of the Republic has hitherto been but imperfectly opened up to exploration and the working of mines, owing to the difficulty of communication in that direction and the great distance from centres of population, and in this manner the mineral kingdom there has not yet been made to yield to the extent of its capabilities. These drawbacks will vanish however from the moment the Northern Railroad shall be trown open to traffic. This Railroad is destined to change the face of the country and place within reach of the nation the many natural resources still hidden away unexplored.

Manufactures. The reason why industry in Guatemala is still comparatively speaking in a state of infancy has to be searched for, perhaps, in the circumstance that the Government now administering the country has been obliged to concentrate its attention more exclusively on agriculture and the means of transportation and communication. These branches had been either neglected or lost sight of altogether by previous administrations. It should here be added that steam power has thus far not been much introduced in the country, and this is another cause of the trifling number of manufactures of Guatemalan make exhibited at the Boston show. Despite these obstacles there are a great many departments in the Republic where real progress is going on in the manufacturing branch, so that the requisite machinery for improving this industry has begun to be procured. Many Guatemalan youths have gone into the study of the mechanical arts; the branches preferred in the country as a pursuit being wool and cotton industry, and new channels of profitable occupation will soon be thrown open in this direction.

LIST

*of the Products of the Country forwarded by the Secretary
of Public Works of the Republic of Guatemala
to the Boston Exhibition of*
1883.

TEXTILE FIBRES.

No. 242.—*Pita floja or soft agave fibre.* (Product of the *Fourcroya gigantea*.) Panimá, Department of Lower Verapaz.

No. 243.—*Escobilla.* (Product of Malvacea.) Cyotenango, Department of Suchitepéquez. Exhibited by Simon Sandoval. Capetillo, department of Sacatepéquez. Exhibited by Juan J. Rodriguez.

No. 244.—*Rush.* (Product of the *Carludovica palmata*.) Cababon, Department of Upper Verapaz. Exhibited by Cornelio Lopez. Panimá, Department of Lower Verapaz.

No. 245.—*Maguey fibre.* (*Agave americana*.) Capetillo, Department of Sacatepéquez; exhibited by Juan J Rodriguez.

BARKS.

- No. 246.—*Cascarilla*. The bark of *Broton eluteria*; it is a tonic and stimulant. Department of Sacatepéquez.
- No. 247.—*Tanning bark*. The bark of various species of Oak (*Quercus*) abounding in tannin.
- No. 248.—*Copalchi*. The bark of *Croton pseudo-Quina*. A remedy for the cure of intermittent fevers.
- No. 249.—*Chiquique*. Febrifuge bark of a Loganiaceae.
- No. 250.—*Quinine bark*. The bark of *Cinchona enci rubra*, Coban, Department of Upper Verapaz. Exhibited by Francisco Sarg.

FRUITS, ROSINS, GUMS, BALSAMS, ROOTS, &c.

- No. 251.—*Chan*. The seed of *Salvia Chio*; is used for preparing a refreshing beverage and yields an oil superior to linseed oil. Department of Sacatepéquez.
- No. 252.—*Vegetable Tallow*; product of *Myristica sebifera*. Retalhuleu; Department of Retalhuleu. Santiago Atitlan, Department of Sololá.
- No. 253.—*Tamarind* from the department of Zacapa.
- No. 254.—*Red Marañon*.
- No. 255.—*Black Deer's eye*.
- No. 256.—*White Deer's eye*.
- No. 257.—*Sand-box tree*.
- No. 258.—*Cypress*.
- No. 259.—*Jatoncillo*.
- No. 260.—*Red Higuerrillo*.
- No. 261.—*Higuerrillo*.
- No. 262.—*Anís*.
- No. 263.—*Anatto*.
- No. 264.—*Nanacascote* or *Dividivi*; the fruit of *Caedalpina coriera*, abounds in tannin; is used for tanning purposes and dyeing black. Retalhuleu. Department of Retalhuleu.
- No. 265.—*Chiapas pimento*; the fruit of *Eugenia pimienta*. Department of Huehuetenango and Suchitepéquez.

- No. 266.—*Vanilla*; the fruit of *Epidodendron*. Department of Escuintla. San Felipe, Department of Suchitepéquez. Exhibited by Albert Ceciles.
- No. 267.—*Ginger*.
- No. 268.—*Yellow sweet potatoes*.
- No. 269.—*Sarsaparilla*, of Upper Verapaz. Exhibited by Francisco Sarg and Luis García, Coban.
- No. 270.—*India Rubber*. Gum elastic of the *Siphonia elastica*. Two slabs from the banks of the Salinas River. Exhibited by Francisco Sarg. Coban.
- No. 271.—*Escuintla India Rubber*, from the banks of rivers Polochic and Malacatan.
- No. 272.—*Piñon milky juice* from the Department of Sacatepéquez.
- No. 273.—*Medicinal Balsam wax* from the Department of Sacatepéquez.
- No. 274.—*Vegetable wax*; the product of the Arrayan tree. *Myrica cerifera*. Chilascó, Department of Lower Verapaz.
- No. 275.—*Balsamite*.
- No. 276.—*Gum arabic*.
- No. 277.—*Logwood*.
- No. 278.—*Cojou condensed milk*. (*Taberna montana*). Guanagazapa, Department of Escuintla.
- No. 279.—*Yellow wax*; Department of Sacatepéquez.
- No. 280.—*Castile wax*, Department of Sacatepéquez. Rodeo, Department of Lower Verapaz; exhibited by Raimundo García.

COFFEE. (*Coffée arabica*.)

(In the berry, in parchment and washed.)

- No. 281.—*Escuintla coffee*.
- No. 282.—*Pearl coffee* of Guatemala. Exhibited by O. Bleuler & Co.
- No. 283.—*Prime Guatemala coffee*. Exhibited by O. Bleuler & Co.
- No. 284.—*Prime Tumbador coffee*. Exhibited by Parlange & Rodriguez; Department of San Marcos.
- No. 285.—*Second quality "Tumbador" coffee*; exhibited by Par-

lange & Rodriguez; Department of San Márcos.

- No. 286.—*Guatemala coffee in the parchment* (shell.) Guatemala. Exhibited by Manuel Herrera.
- No. 287.—*Coffee in the berry.* Exhibited by Manuel Herrera.
- No. 288.—*Prime Guatemala Pearl coffee.* Exhibited by Manuel Herrera.
- No. 289.—*Prime coffee* from the "El Porvenir" Estate. Department of San Márcos. Exhibited by General J. Rufino Barrios.
- No. 290.—*Coffee* from the "Nahuatancillo" plantation. Tumbador. Department of San Márcos. Exhibited by Mr. Bachantin.
- No. 291.—*Prime Guatemala coffee.* Exhibited by Manuel Herrera.
- No. 292.—*Coffee* from the "Santa Elena" plantation. Tumbador. Department of San Márcos. Exhibited by J. María R. Aguilar.
- No. 293.—*Coffee* from the "Ferrol" Estate. Tumbador. Exhibited by D. Gonzalez.
- No. 294.—*Coffee* from the "Montevideo" Estate. Tumbador. Exhibited by Márcos Barrios.
